Rating Analysis - 10/24/16

With a healthy budget surplus and the sovereign debt equal to only 16.27% of the GDP, Switzerland has a fairly strong credit profile. Switzerland's balance of trade has been positive for the past ten years, although there has been a deceleration due to the termination of the exchange rate peg to the Euro (+0.9% in 2015 vs 19.03% in 2013). The current account surplus represents approximately 50% of GDP.

Despite the country's strong economic model, downside risks remain relative to the Swiss currency appreciation and immigration issues. The strength of the Swiss franc enhances deflationary pressures - inflation was -1.1% in 2015 compared to -0.0% in 2014. The GDP declined slightly in 2015, but has picked up in the recent quarters. Ageing population and the recent international initiatives to address illegal banking activities will affect the business environment in the long term. Affirming.

#### Page 2

### Economic Growth

Switzerland has a historically stable economic growth. However, in 2015 the GDP declined 1.5% compared to a 3% gain in 2010, primarily due to the termination of the CHF-EUR exchange rate peg in early 2015. As Europe accounts for over 40% of total exports, the appreciation of Swiss franc (+22% relative to Euro in two days after the announcement, or +10% to date) poses a risk for exporters and feeds potential deflationary pressure.

On the positive side, private consumption is a major driver of growth. The country's specialization in manufacturing of high value-added and luxury goods also offers some assurance due to the relatively low demand elasticity. Watch for productivity pressures associated with the aging population.

### **Fiscal Policy**

With a Surplus-to-GDP ratio of 0.27%, the Swiss government is self-sufficient. As shown in the chart to right, the level of Switzerland sovereign debt is much lower than that of other peer countries, at a comfortable 16.27% of the GDP, a rate which continues to decline. Switzerland's 5-year CDS spread is also one of lowest among its peers.

|                                  | Surplus-to- | Debt-to- | 5 Yr. CDS |  |  |  |

### Unemployment

Switzerland's unemployment rate is among the lowest in Europe, in part thanks to the government's management of immigration policy which counters any volatility in the domestic job market. Pressures from EU on the immigration free movement is a long-term concern, especially after the Brexit referendum as Brussels might toughen its stance.

## Banking Sector

History has shown that country and bank obligations are linked during times of economic distress. The overall size of the top five banks in Switzerland is huge, with total assets equaling approximately 293% of GDP. One reassuring factor is that the banking sector is relatively healthy. Non-performing loan ratio rose from 0.72% in 2014 to 0.75% in 2015, but remained relatively low.

| Bank Assets (billions of local c | urrency) |             |

## **Funding Costs**

Switzerland's funding costs have been declining in the recent years due to the prevailing low interest rates in Europe. As shown in the chart below, the 2-year, 5-year and 10-year sovereign debt yields have all entered the negative territory. We are expecting the interest rates to remain low in the foreseeable future.

## Ease of Doing Business

Major factors for growing the economy are the ease of doing business and the economic freedom; although not the sole factor for determining economic growth, a country which makes it easy for businesses to operate and provides a reasonably free environment to conduct business has a good chance for growth. The chart on the right indicates that with an overall rank of 26 (1 is best, 189 worst) is strong.

### Valuation Driver: Taxes Growth:

SWISS CONFEDERATION has grown its taxes of 4.1% per annum in the last fiscal year which is disappointing. We expect tax revenues will grow approximately 4.1% per annum over the next couple of years and 4.1% per annum for the next couple of years thereafter.

### Valuation Driver: Total Revenue Growth:

SWISS CONFEDERATION's total revenue growth has been more than its peers and we assumed a 4.0% growth in total revenue growth over the next two years.

## SEC Rule 17g-7(a) Disclosure

Below are the disclosures as required by Paragraph (a) of Rule 17g-7.

## 1. The symbol in the rating scale used to denote the credit rating categories and notches within categories and the

*identity of the obligor, security, or money market instrument as required by Paragraph (a)(1)(ii)(A) of Rule 17g-7:* For the issuer SWISS CONFEDERATION with the ticker of 344758Z SW we have assigned the senior unsecured rating of AAA. There are three notches in our rating categories (e.g., A-, A, and A+) other than those deep into speculative grade; for CC, C, and D there are no notches.

# 2. The version of the procedure or methodology used to determine the credit rating as required by Paragraph (a)(1)(ii)(B) of Rule 17g-7:

We are using the methodology available in our Form NRSRO Exhibit #2 dated May 10, 2015 available via egan-jones.com under the tab at the bottom of the page "Methodologies".

# 3. The main assumptions and principles used in constructing the procedures and methodologies used to determine the credit rating as required by Paragraph (a)(1)(ii)(C) of Rule 17g-7:

The credit rating assigned reflects our judgement regarding the future credit quality of the issuer. Regarding the specific assumptions used, please refer to page 3 of this Rating Analysis Report.

#### 4. The potential limitations of the credit rating as required by Paragraph (a)(1)(ii)(D) of Rule 17g-7:

Our rating pertains solely to our view of current and prospective credit quality. Our rating does not address pricing, liquidity, or other risks associated with holding investments in the issuer.

#### 5. Information on the uncertainty of the credit rating as required by Paragraph (a)(1)(ii)(E) of Rule 17g-7:

Our rating is dependant on numerous factors including the reliability, accuracy, and quality of the data relied used in determining the credit rating. The data is sourced from publicly-available 10Q and 10K statements, quarterly reports, 8K filings, earnings reports, and other similar sources. In some cases, the information is limited because of issues such as short operating histories, the lack of reported data, a delay in reporting data, restatements, inaccurate accounting, and other issues. Such shortcomings are not always readily apparent. EJR aims to identify such shortcomings and make adjustments using its best judgement.

# 6. Whether and to what extent third-party due diligence services have been used in taking the rating action as required by Paragraph (a)(1)(ii)(F) of Rule 17g-7:

EJR does not utilize third-party due diligence services.

# 7. How servicer or remittance reports were used, and with what frequency, to conduct surveillance of the credit rating as required by Paragraph (a)(1)(ii)(G) of Rule 17g-7:

Servicer or remittance reports normally pertain to structured finance issuers; this report does not pertain to a structured finance issuer (EJR is not an NRSRO for structured finance or sovereigns/ municipal issuers). Regarding surveillance, the minimum time period for corporation issuers is normally one year.

# 8. A description of the data that were relied upon for the purpose of determining the credit rating as required by Paragraph (a)(1)(ii)(H) of Rule 17g-7:

EJR uses 10Q and 10K statements, quarterly reports, 8K filings, earnings reports, and other similar sources for ratings on publicly-traded issuers. In the case of private issuers, EJR relies on information provided mainly by issuers.

# 9. A statement containing an overall assessment of the quality of information available and considered in the credit rating as required by Paragraph (a)(1)(ii)(I) of Rule 17g-7: The information is generally high quality and readily avail.

10. Information relating to conflicts of interest as required by Paragraph (a)(1)(ii)(J) of Rule 17g-7: This rating is unsolicited.

Page 10

### \*EJR Sen Rating(Curr/Prj) AAA/ AAA \*EJR CP Rating: A1+ EJR's 7 yr. Default Probability: 0.0% Other NRSRO Rating: AAA

#### 11. An explanation or measure of the potential volatility of the credit rating as required by Paragraph (a)(1)(ii)(K) of Rule 17g-7:

Our rating aims to assess the probability of the payment of obligations in full and on-time. Factors which affect such probability, and in turn our rating, include changes in the operating performance of the issuer, changes in capital structure, and merger and acquisition events.

#### 12. Information on the content of the credit rating as required by Paragraph (a)(1)(ii)(L) of Rule 17g-7:

Regarding the historical performance of the credit rating, our rating transition matrix is available in our Form NRSRO, exhibit 1. The expected probability of default and the expected loss in the event of default is listed on the first page of this report.

**13.** Information on the sensitivity of the credit rating to assumptions as required by Paragraph (a)(1)(ii)(M) of Rule 17g-7: Below is a summary of the impact of the 5 assumptions which independently would have the greatest impact on our "ratio-implied rating":

|                                  | Assumptions |            |             | Resulting Ratio-Implied Rating |            |             |
|----------------------------------|-------------|------------|-------------|--------------------------------|------------|-------------|
|                                  | Base        | Optimistic | Pessimistic | Base                           | Optimistic | Pessimistic |
| Taxes Growth%                    | 4.1         | 8.1        | 0.1         | AA+                            | AA+        | AA+         |
| Social Contributions Growth %    |             | (3.0)      | 3.0         | AA+                            | AA+        | AA+         |
| Other Revenue Growth %           | 3.7         | 0.7        | 6.7         | AA+                            | AA+        | AA+         |
| Total Revenue Growth%            | 4.0         | 2.0        | 6.0         | AA+                            | AA+        | AA+         |
| Monetary Gold and SDR's Growth % | 5.0         | 3.0        | 7.0         | AA+                            | AA+        | AA+         |

14. If the credit rating is assigned to an asset-backed security, a description of: (i) the representations, warranties, and enforcement mechanisms available to investors; and (ii) how they differ from the representations, warranties, and enforcement mechanisms in issuances of similar securities, as required by Paragraph (a)(1)(ii)(N) of Rule 17g-7: This credit rating is not assigned to an asset-backed security.

### ATTESTATION FORM

In compliance with the US Securities and Exchange Commission (SEC) Rule 17g-7(a), the Egan-Jones analyst who published the report is responsible for the rating action and to the best knowledge of the person:

- 1) No part of the credit rating was influenced by any other business activities,
- 2) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated, and
- The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.

# Sovereign Rating Methodology (Non-NRSRO)

Scope and Limitations: Sovereign Issuer Credit Quality Ratings (CQR) are a forwardlooking assessment of a sovereign's capacity and willingness to honor its existing and

future obligations in full and on time. Sovereigns are assigned two CQRs: a Local-Currency CQR, which reflects the likelihood of default on debt issued and payable in the currency of the sovereign, and a Foreign-Currency CQR, which is an assessment of the credit risk associated with debt issued and payable in foreign currencies.

**Key Rating Drivers: EJR's approach to sovereign risk analysis is a synthesis of quantitative** and qualitative judgments. The quantitative factors EJR uses are:

- Debt in relation to GDP.
- Surplus or deficit in relation to GDP.
- Debt plus potential under-funding of major banks in relation to GDP.
- Interest expense in relation to taxes.
- GDP growth.
- Foreign reserves in relation to debt.

Debt levels for many sovereign issuers have increased at an accelerating rate over the past decade, affecting implied ratings. EJR also considers unemployment levels and funding costs. EJR recognizes that no model can fully capture all the relevant influences on sovereign creditworthiness, meaning that the its sovereign ratings can and do differ from those implied by the rating model. Some of the qualitative factors that impact its ultimate assessment of credit quality include the flexibility, stability and overall strength of the economy, efficiency of tax collection, acceptance of contract law, ease of doing business, trade balances, prospects for future growth and health and monetary policy, and economic freedom. These subjective and dynamic qualitative issues are not captured by the model but affect sovereign ratings

For additional information, please see Exhibit 2: Methodologies in EJR's Form NRSRO.
